CREATED WITHOUT COMPROMISE

by experienced equine nutritionists

EQUINE NUTRITIONIST GRADUATE PROGRAMME

TopSpec is the United Kingdom's largest specialist manufacturer of feed balancers and other innovative horse feeds. It is owned and managed by experienced equine nutritionists. TopSpec products incorporate the very latest equine research including the work carried out in TopSpec's own equine nutrition facilities at Middle Park Farm and leading universities worldwide.

Our experienced equine nutritionists provide advice to vets, farriers, nutritionists and horse owners throughout Europe.

TopSpec has always been at the forefront of technological developments; from producing the first high biotin broad-spectrum supplements for horses in Europe in the eighties, the production of the first comprehensive supplements in the nineties, through to the incorporation into balancers of advanced probiotic substances researched by The Royal Veterinary School in Edinburgh.

Due to the continued rapid expansion of the Company we are initiating a Graduate Programme for an outstanding candidate seeking to develop a permanent career in equine nutrition. The position will be based at our research facility at Middle Park Farm near Thirsk but will involve travelling to clients around the UK and Ireland.

The programme will consist of a wide range of opportunities to work along side our team of experienced equine nutritionists. This will include advising clients on the award-winning helpline, visiting yards and retail outlets with our field team, and attending events around the country.

Applicants must have an honours degree in animal nutrition, or a closely related science, from a good university together with wide personal experience of horse management.

A competitive reward package will be offered to the successful candidate.

If you wish to apply please send your CV, including a brief summary of why you feel you would make a good candidate, by e-mail to Gil Wilson, human resources manager, at the address below.
